ASSESSMENT (05-10-26)

Topic Name: Structuring a basic Python conversational loop

TASK :

Build a simple rule-based conversational chatbot in Python. Your chatbot must interact continuously with the user, recognize different messages, provide appropriate responses, and allow the user to exit.

CODE:

```
[1] 1 name = input("What is your name: ").lower().strip()
    2
    3 while True:
    4     message = input("You: ").lower().strip()
    5     if "exit" in message or "bye" in message:
    6         print(f"Bye {name}")
    7         break
    8     elif "hello" in message or "hi" in message:
    9         print(f"Hey there {name}")
    10    elif "joke" in message:
    11        print("That's great. Take a spoon and fill it with water.")
    12        print("Then jump into that 🥰")
    13    elif "how are you" in message:
    14        print(f"Thanks for asking....❤️ How are you Mr. {name}?")
    15    else:
    16        print("Sorry I can't hear you. Try with another message")
```

OUTPUT:

```
... What is your name: Sannidhi Jeevana Surya Prakash
You: how are you
Thanks for asking....❤️ How are you Mr. sannidhi jeevana surya prakash?
You: Tell me a joke
That's great. Take a spoon and fill it with water.
Then jump into that 🥰
You: Hello
Hey there sannidhi jeevana surya prakash
You: how did i know to you
Sorry I can't hear you. Try with another message
You: Bye
Bye sannidhi jeevana surya prakash
```
